

# Radon Detection Canisters

## Employing Activated Charcoal

### Bulk Price List

Radon Detek style 'SG' canisters are designed for Real Estate radon test period lasting 2 days. Style 'DB' is a diffusion barrier type designed to be exposed for 2 to 5 days. TCS is a PRIMARY laboratory for both canister types. We are NRSB and PA DEP listed for AC laboratory analysis and have individuals listed for CR and AC field measurements. TCS is listed by the NRSB for Secondary Chamber Operations.

TCS uses six computer integrated multi-channel gamma spectrometers for accurate and timely results. Written reports are mailed the next business day after receipt of canisters. We can fax or e-mail results on request.
